## Frame Tents

We are able to set these tents up in almost any setting. All Reasons Personnel construct the "framework" for the canopy on the ground; we then fit the canopy over the framework and then lift the entire structure onto the legs. This provides you with an open span from one end of the tent to the other with no obstructions.

10x10 frame	\$150.00
10x20 frame	\$250.00

## Pole Tents

These tents require flatter surfaces for installation but are quick and easy to install.

The canopy is laid out on the ground and stretched to square; the corner legs are installed and pulled tight; then the rest of the side legs are installed. Finally, the centre poles are installed. The size of tent will determine how many centre poles are required.
